

TECHNICAL LEAD

SYDNEY - FULL TIME / SALARY + EQUITY

Have you ever tried to upgrade, but found the experience elusive and confusing? We couldn't agree more. Which is exactly why Seatfrog is making the world of upgrading an amazing experience and a joy to use for travellers all over the globe. We've just launched with Virgin Trains in the UK and we have even more exciting announcements in the pipeline for early 2018.

Seatfrog is an exciting place to work. We're backed and advised by some of the smartest and brightest minds in travel from all over the globe. We've assembled a team of leaders who are some of the world's best strategists, designers, technologists and data scientists, and we all love coming to work because we only hire nice, smart and energetic people.

At Seatfrog we make sure you have an environment where you can do amazing work and pursue your dreams. This is a culture with substance where collaboration, growth, beautiful design, outstanding results and success are massively encouraged.

So, this amazing job we've been talking about...

We are looking for a solution focussed Technical Lead to who can lead and mentor our team of junior and mid-level engineers across a number of components in our platform, including native phone apps, websites and APIs.

What we expect from you

You have a natural ability to find, understand and analyse technical and functional problems. You are able to breakdown and document these to design effective long-term solutions in line with our strategy, balancing user needs with time, budget and risks.

You can lead a team to break down problems and user stories, giving them the right advice and support to help them complete their tasks. You'll be responsible for diligent code reviews, and should be comfortable getting your hands dirty and writing code to tackle more complex problems.

Your background

- You have 8 years experience in a number of different technical roles.
- You have worked with a wide variety of technologies across front-end, back-end, devops and product development.
- You are programming language agnostic, and are comfortable picking up new languages
- You have a solid understanding of computing fundamentals - networks, operating systems security and programming language concepts.
- You have worked in an agile project environment utilising the SCRUM or KANBAN framework.
- Knowledge about Amadeus or other GDS is a big plus but not essential

If this sounds like your perfect gig, email us today at careers@seatfrog.com.

In your email, we'd love to hear the top line about you, the achievements that you're proud of and examples of your work. But most importantly, why do you want to work with us at Seatfrog?

Amazing careers with the Seatfrog team.
