MID-LEVEL DEVOPS ENGINEER
SYDNEY - FULL TIME / LONG TERM GROWTH PLAN /
COMPETITIVE SALARY + PERKS

Have you ever tried to upgrade, but found the experience elusive and confusing? We couldn't agree more. Which is exactly why Seatfrog is making the world of upgrading an amazing experience and a joy to use for travellers all over the globe. We've just launched with Virgin Trains in the UK and we have even more exciting announcements in the pipeline for early 2018.

Seatfrog is a great place to work. We're backed and advised by some of the smartest and brightest minds in travel from all over the globe. We've assembled a team of leaders who are some of the world's best strategists, designers, technologists and data scientists, and we love coming to work because we only hire nice, smart and energetic people.

At Seatfrog we make sure you have an environment where you can do amazing work and pursue your dreams. This is a culture with substance where collaboration, growth, beautiful design, outstanding results and success are massively encouraged.

So, this amazing job we've been talking about...
We currently leverage the AWS stack that consists of ECS, RDS, SQS, Terraform, Concourse CI and Docker.

We are taking this to the next level for greater scalability and robustness, streamlining our workflow to support business growth.

Working directly with the CTO, you will be responsible for:
- Maintaining and optimising Seatfrog environments,
- Monitoring and extending our CI platform,
- Identifying process improvements,
- Collaborating with team members to maintain systems documentation,
- Supporting the technical team across other development tasks as required.

Your skills and experience
You have a passion for new technology, are program language agnostic and able to pick up new languages quickly. You thrive in a fast-paced environment. You create infrastructure code that is understandable, simple, and clean. You are comfortable in handling sensitive data and are passionate about computer and data security.

As a solutions-focused and adaptive team player, you'll have:
- A degree in computer science and a few years of relevant experience in application development, with exposure to AWS and Linux as well as a keen interest in devops.
- Knowledge of ECS and concourse is not mandatory but you need to be keen to learn.
- A passion for technology, you are programming language agnostic and able to pick up new languages.
- Ability to work in a team to analyse and understand technical and functional problems to find ways to optimise and simplify Seatfrog's environments, with long-term implications in mind.
- Strong attention to detail and a keen interest in working with a team of technical and non-technical stakeholders.

Amazing careers with the Seatfrog team.

What's on offer:

- A fantastic opportunity to work in a global software company and help shape Seatfrog's infrastructure.
- An outstanding team culture, where we solve problems together to drive results.
- A personalised development and growth plan to help you progress in your role and create a long-term career path within Seatfrog.

Does this sound like you?

Email us your CV today at careers@seatfrog.com and tell us a bit about you, the work you have done to date, as well as any achievements that you're proud of. And importantly, why do you want to work with us at Seatfrog?
